

Filtered Water Wherever, Whenever

Advanced Filtration Solutions For Sustainable Campuses

At educational institutions, reliable, clean, and great tasting drinking water is essential as busy students and staff need to remain hydrated. With a wide variety of Quench bottleless water dispensers, those hydration needs can easily be met all over campus.

Environmentally conscious students are ditching the single-use water bottles, replacing them with reusable water bottles that do better for their wallets and the environment. Colleges and Universities are joining student sustainability efforts by switching to bottleless water coolers from Quench. Quench's bottleless water coolers eliminate the need for 5-gallon jugs and plastic single-serve bottles from campuses and schools while also reducing their carbon footprint.

Advanced Filtration Solutions

Many schools operate in old buildings, which means water is running through old pipes and picking up any contaminants along the way, including lead.

Quench's state-of-the-art filtration can reduce up to 99.9% of lead in school water amongst other impurities, like sediment and chlorine, and eliminate off-tastes and odors to provide users with clean, great-tasting water.

Education's Most Trusted Filtered Water Provider

Quench is the leading water-as-a-service solution to over 400 school districts, secondary schools, colleges and universities coast-to-coast. Education customers choose Quench as their preferred partner because of our depth of hydration solutions, our national reach, and world-class service.
