

## Better Drinking Water in Store

Boutiques | Inline Tenants | Anchors | Box Stores

### A Better Solution for the Showroom and the Stockroom

Quench offers the broadest hydration solutions to meet the needs of any retail space:

- Durable water and ice dispenser for staff in a receiving area or stock room
- Touchless dispensing water cooler for thirsty shoppers
- Flavored sparkling water for an enhanced boutique shopping experience
- Single-cup coffee brewers for waiting rooms

All Quench machines use point-of-use filtration technology to consistently provide great-tasting, freshly filtered drinking water. Also, Quench's exclusive Q-Series water cooler line offers mineral-infused and electrolyte-enhanced water on-demand with quenchWATER+.

### Customer Satisfaction is Priority #1

Quench has a dedicated customer service team of field technicians and customer care representatives with extensive knowledge about our equipment and filtration technologies.

Quench field technicians are certified to tackle installations in the most complicated spaces, including giant warehouse stores, elegant showroom floors, or small boutiques, without disrupting your customers or disturbing your décor.

Quench offers dedicated customer service teams for multi-outlet national accounts with consolidated invoice billing options.

### Eco-Friendly Solutions that Saves Money

Switching to a bottleless water cooler is a quick win for any sustainability initiative. One Quench bottleless water cooler can off-set the CO<sub>2</sub> equivalent of 42,000 miles in a passenger vehicle!

What's more many Quench retail customers see immediate cost savings of up to 80% when they switch from a bottled water delivery service. And that's before factoring in any "shrinkage" of packaged water that employees may pull from stock!

#### Quench Customers:

- Sam's Club
