

# Clean Water Is Essential to Quality Healthcare

## Clean Water is Critical

Quench's state-of-the-art filtration technologies remove sediment, eliminate off-tastes and odors, and reduce chemical contaminants, including 99% of lead.

Quench's filters are NSF/ANSI 42 or NSF/ANSI 58 certified by independent authorized 3rd party laboratories to guarantee crisp and clean drinking water. Quench water and ice systems feature UV-C sanitization, antimicrobial surface protection, recessed spigots, food-grade tubing, and stainless steel tanks to maintain water cleanliness through dispensing.

Also, only Quench offers mineral-infused and electrolyte enhanced filtered drinking water on-demand with quenchWATER+, which some studies indicate may allow the body to absorb water more readily.\*

## Healthcare's Most Trusted Filtered Water Provider

Quench is the leading water-as-a-service solution provider to thousands of healthcare organizations coast-to-coast. Healthcare customers choose Quench as their preferred partner because of our depth of hydration solutions, including point-of-use water coolers, chewable ice machines and sparkling water dispensers, national reach, and world-class service.

## Quench Customers

- Mount Sinai Medical Center
